Until recently, a host would never include the washing area in a tour of their home. It was a space that gathered plenty of lost socks and balls of lint, but not design admiration. While laundry rooms have long been all work and no play, the tides have turned. Regardless of size, there are plenty of features and accessories you can introduce to your laundry room to improve its overall style and function.
Whether you are washing, drying, sorting or folding, your laundry room is bound to get a lot of use. Custom cabinetry can brighten up your space and boost its functionality. With the perfect mixture of finishes and colors, your area becomes a comfortable and calming place to do the household cleaning. This room pairs high-gloss blue storage and metallic hardware with light-colored walls, amplifying the light streaming in from the window. The effect is a modern, bright and airy feel.
Contain chaos to one small area, and keep the rest of the room feeling clean and organized. Dedicate one section of open shelving for clean items like fluffy fresh bath towels. When storing these essentials, use the hotel fold. First fold the towel in thirds lengthwise, then in thirds again. Place the towels with the edges facing the back of your shelf for a seamless look.
A space that welcomes you in and invites you to stay a while.

Between spilled lunches and sweaty after school activities, you find yourself doing 4-5 loads of laundry a week. Just when you think you’re finished, the basket starts to fill up again, causing laundry to be your least favorite chore. Acting as a dumping zone, this room includes a multitude of baskets, cabinets and closets to hide the family’s mess from any visitor in style.
Little adjustments to your attitude and routine can help take the wrinkles out of doing the wash. An ironing board is a household essential that’s often forgotten about when designing a home. However, it’s one of those necessary evils, like vacuums, toilet brushes and buckets. Instead of shoving a clunky ironing board behind a washer or closet, try a drawer-mounted, pull-out system.
More time doing what you love,

THANKS TO ERGONOMICS, STORAGE & SPECIAL FEATURES.
BREEZE THROUGH LAUNDRY LIKE A BOSS

A custom design offers plenty of creative ways to sneak extra storage and time-savers into your laundry room. Eye-catching designs prove that your home's most common multifunctional space can be both beautiful and efficient. Natural light, storage and style go a long way in making this chore more enjoyable. Add a few personal touches that give the space character, like a picture frame on the counter or a vase of fresh cut flowers.
LAUNDRY ROOM FOR THE QUEEN OF CLEAN

The equation is simple: You wear clothes. You wash clothes (and towels, sheets and bedding too). A custom laundry room combines the equipment, tools and supplies needed to get the job done quickly. Having a designated space to assemble, sort, wash, dry, fold and return clean clothing and bedding to their rightful places will make you feel accomplished and organized.
